Continue growing as a developer, contribute to real projects and build software solutions that create value.

RAMSÉS BALTODANO

FULL STACK DEVELOPER

Java · Spring Boot · REST APIs · JavaScript · PostgreSQL/MySQL · Docker

PROFESSIONAL SUMMARY

Full Stack Developer focused on building modern web applications, business solutions and intuitive digital experiences, using Java, Spring Boot, HTML, CSS and JavaScript with clean code principles and user-centered design. Currently strengthening frontend, backend and software architecture skills through personal projects, while looking for opportunities to grow in the technology field.

FEATURED PROJECTS

NexusCRM *Java · Spring Boot · PostgreSQL*

Developed an enterprise CRM platform that centralizes customer and sales management, implementing a layered backend architecture with Java, Spring Boot and PostgreSQL.

DevFlow *HTML · CSS · JavaScript*

Built a SaaS-style project management dashboard that organizes tasks on visual boards, achieving a responsive and interactive interface with HTML, CSS and JavaScript.

POS System *Java · Spring Boot · Database*

Implemented a Point of Sale system that streamlines sales, inventory and payments, with backend logic in Java and Spring Boot connected to a relational database.

Restaurant Landing *HTML · CSS · JavaScript*

Created a responsive website for a restaurant that improves its digital presence for new customers, with added interactivity through JavaScript.

Andy Barber *HTML · CSS · JavaScript*

Developed the professional website for a modern barbershop to strengthen its digital presence, with a clean and responsive interface in HTML, CSS and JavaScript.
